"What is your mental illness and do you take meds?
I'm bipolar 1 schizoaffective with psychosis...
Why does it seem like everyone knows what's going on but us?"
--(Kenny Lum) ... ;

I'm Schizoaffective was Bipolar before, I don't pay attention to Psychiatry, because it's not a real science, they used to lobotomize Holocaust Deniers, and people who were against the Weimar Republic In Germany and the USSR in Russia, it is just a Political Economic Tool, they do not scan your brain for anything, no blood tests either, Psychiatry just is not a Science, I Go with Neurology instead as Neurology unstands that the FoxP2 Gene Gave us Language which then we chose to make Banking and UCC and Government with that.

I used to be Depression in The Beginning of School, they only got me bad my senior year in High School, I became a total eunuch, I am like asexual, these meds are poison and not based on science, I almost died of a heart problem, it is truly not backed by any real science, Dr Peter Breggin and Colin Ross are two Great Authors who exposed this, PDF books of them Are Free, You don't have to pay for books, I convert EPUB to PDF and I click the Link and it goes to the chapter, My Narcisstic Family is tied to a Religious Cult and they got me labeled, it is so common to have Believe or Go to Hell in your family, My Family are a bunch of bullies, they terrorized me and Gang Stalked me, I had to level up now that I'm 31 and Prime I know what to do and I can tell them I am old enough to do things on my own, because I am 31 not 18 or some other age, they are just narcissists that use psychiatry on people who don't agree with say Zionism or Freemasonry or whatever ... ;

Not only that, all my progress notes are made up fake perjury, they intentionally replaced the gas line for the furnace with a PVC pipe to make it look like I did something, they use that to discredit me as a crazy person, they mixed my info up with another guy who lived in a one bedroom apartment, the shrink was hostile screaming at me, because he thought I was someone else, the psychiatrist was about to throw things at me and assault me, but I have the audio as Fourty Eight K Mp3 so joke is on him, psychiatrists are not background checked, they sexually abuse minors and the elderly all the time and the press ignores it as Jews control the press and Psychiatry Big Pharma Vaccines is all Jewish Fraud Quackery.

--Scott A. Barry ... ;

I told my shrink I would take only One Zyprexa and Four Dapakotes, because I don't believe in Psychiatry and run a Website
flushyourmedscomarchivetodayorgpermacc ... ;

My latest shrink demanded I take at least one Zyprexa which I take with Supplements such as Cayenne Pepper, Ozonated Water, Colloidal Silver, Chaga Mushroom, Reishi, etc.

You have to take fermented probiotics on these meds, their basically like antibiotics, meaning they are useless pseudoscientific BS Poison that only is used for Jewish Eugenics ... ;
Used to be Depression, Then Bipolar, then now Schizoaffective for telling them I believed in ghosts and that when humans die they become Telepathic Ghosts, Emily told me to keep that a secret, now I know why Remote Viewers keep Secrets, so Shrinks don't drug them. BTW Emily is a Ghost age fifteen who died below my hose that was built in 2003 AD ... ;
Madrona Park in Olympia Washington was built on top of Previous people who lived there before computers, they built the houses on top of starting after 911 happened in USA ... ;
That's why Olympia has some Ghosts and Spirits that Direct Voice you in your house.
--Scott A. Barry ... ;
For Me I found that Linux as Arch Arco Artix was easier to use with File Systems than BSD Unix or Solaris ... ;
Now Also I cannot use a Computer Without LUKS on it ... ;
And Also I must have a Solid State Drive included ... ;
As For CPU a RISC Computer Setup is far more secure than (x86) or (i686) same applies to Mips, Arm, SPARC, etc.
Now when I had a Mips from China it was a waste of money, a dumb investment, was slow with GPU, had to boot from a dot cfg file, was inconvenient and useless for me ... ;
Live Operating Systems on Ram Disk will Mitigate as this is a Better Security Protocol to use as well, you can run an ISO file in Virtual Machine, Qemu-Virtualbox and it Virtual Machine will protect the BIOS from Damage ... ;
For a RISC or (x86) Server using Ubuntu Server was more convenient than Debian as it had more out of the box features and was easier to set up as an Samba or other home server ... ;
For My CPU intel i5 (x86) as of 2020 I used single core, low power mode, acceleration off, no SMT, on Arch Linux and it does the job rendering basic 480p videos for what I do ... ;
As you know I am amish luddite who lives on a farm, I do computing far different than you do, I play no games except, I run Quake and Doom and First Person Shooter on an older Four Eighty Six Computer and call it a day as it's bad*** ... ;
I turn of Intel Management Engine and CPU features off low power mode single core, then I removea all the metal components from my Lenovo m93p case so as of it gets a vent through the optical drive of the case, I like my Eight GB of Ram as this is the proper amount that the MOSFET in computer can handle, also I use Samsung T7 as my SSD boot Device, I never wanted to boot an inefficient Spinning Hard drive ever period ... ;
For the desk I zip tied a USB Cable Type C to an Anker USB Hub for Keyboard WiFi and Wired Mouse, My Keyboard sucks as it is wireless, thats because My other keyboard crapped out,

also I have no money, am force medicated on psych meds, that's how it goes. I use Dual Band WiFi for Mac Address Spoofing faba44f0140 that is my Mac Addresses then I do 20867222222 for the DNS, then I encrypt files in 7zip as AES-256 Encryption and was told you need at least Two Five Six for the Encryption, also (AES) is the only good one thats why Veracrypt also ... ; Luks and BIOS Passwords can be cracked by Sheriff's DEPT also ... ; I have crappy Delta Airlines or KOSS KTX Pro Ones as makeshift Screening Headphones with modern Sennheiser PC3 and HD1 Phones ... ; I record everything in OBS Studio and Simple Screen Recorder, Render it in ffmpeg then Kdenlive as I don't have Sony Vegas ... ; For Graphics I use GIMP and Libreoffice and Inkscape, LibreCAD, then mtpaint and few other tools the bash commands base64 and I always copy it all to six or more Solid State Drives Period ... ; All of Nirvgorillas Claims are Made up as he is Generalizing all Targeted Individuals as we already know how to modify PDFs so they are Interactive, have Searchable Text, EPUBS are Clickable with Links when converted to PDF, Download YT Bitchute Rumble Videos is Piece of cake, Ublock Origin, Privacy Badger, Decentraleyes, HTTPS Everywhere, Canvas Blocker, The Right Web Browsedr, Return YT Dislikes everything he says is only about the fake TIs who pretend they are targeted it is

a soap opera of LOLCOWS and we all know what LOLCOWS do, I do not associate with Stupid Content Creators who act like clowns and pretend

they are targeted and interview nirvgorilla to make real TIs look bad,

also We already understand OSINT and how to get peoples address and other personal information, not only do I dox people, I totally own them, as flushyourmeds I say they are mine, I already browsed through Nirvgorills NGINX unsophisticated Port Eighty Two Server that has less

bandwidth than Kiwi Farms, I have similar Bandwidth to Kiwi Farms also,

I saved all of his stuff as PDF and Raster Images from his gallery Website, It was kind of a soap opera like Kiwi Farms as there are LOLCOWS

such as Chris Chan, Cyraxx, King Cobra JFS, everybody is at a different

level in society, so what, who cares, some of us actualy calibrate that

equipment you are using and we repair it also so suck on that and we get

paid from other Jewish Business too so suck on that small business stuff ... ;

AI Wilkins has funny songs on Jew Tube, again it's a soap opera and those

other TIs Nirv Interviews do not represent former Department of Defense or

Former Central Intelligence Agency or FBI or any of that stuff we have people here who used to work for Security Industry Specialists and Regional Information Sharing Systems both in Seattle Washington Branch so it is not new at all and those Supposed TIS Nirv Talks to are Schizophrenic Actors not Real TIS as we know he deletes interviews and we keep files of those interviews we did on other servers on the internet also stored as block chain and other formats. He accuses other people of flagging videos when other did it not the TIS. Also because of unfair flagging systems people have now moved to other storage mediums and even Home Servers such as what he uses on his Port Eighty Two ... ; Mine is by default port Eighty and Four Four Three as any typical server example would be the CIA website it has two ports, and you do not have to type colon eighty two to go to the server, I archived nirvs gallery server and parent directory to archivetodayorg and did a flushyourmeds banner grab of it as it was running nginx I ran LAMP apache servers File Transfer Protocol and so many other servers when I was only Twelve, I made a server print out Satanist Manuscripts for The Satanist Meetings via SSH Login and FTP commands use (!) to run them so we may be noobs to an extent, but at least we know it was brain damage from taking psychiatric drugs, brain damage from Voice to Skull and D Energy Weapons that's what caused the brain damage along with laser lobotomies and ECT therapy from Shrinks ... ; I'm so brain damaged from psychiatry now I have a hard time getting it up am kind of non sexual or asexual with heterosexual straight so it is a challenge that's why they give these Antipsychotics to Offenders and Criminals in Jails and Prisons ... ; Being a Eunuch is kind of new, I can go on for hours just typing whatever ... ; If you're looking for Psychic Development get Bee Sounds as Flac or WAV format as this

is known as The God Source Ether Note of Nine Six Three and Opens The PSI for easy remote viewing, this is a little secret I discovered along with Lights Strobing at either Eighty BPM or 7831 Cycles this opens up psychic potential along With Pulsed Electromagnetism at Eight through a Tesla Coil and is the Secret of Remote Viewing.
